1 Document Control

Document Title	PsychrometricSolver Functional Design Specification
Project Name	PsychrometricSolver
Version	1.0
Author	Mike Stephenson
Approved by	Mike Stephenson
Date	April 13, 2026

2 Introduction

2.1 Purpose

This document defines the functional requirements for the PsychrometricSolver desktop and tablet application. It performs standard psychrometric calculations.

2.2 Scope

Outline the scope of the system or product.

2.3 References

List relevant standards, regulations, or other documents.

3 System Overview

Provide a high-level description of the system, its boundaries, and main components.

4 Functional Requirements

4.1 Requirement 1

- **Description:** The system shall...
- **Inputs:** Data sources, user input, etc.
- **Processing:** Business logic or rules.
- **Outputs:** Results, reports, UI response.

4.2 Requirement 2

Repeat for each functional requirement.

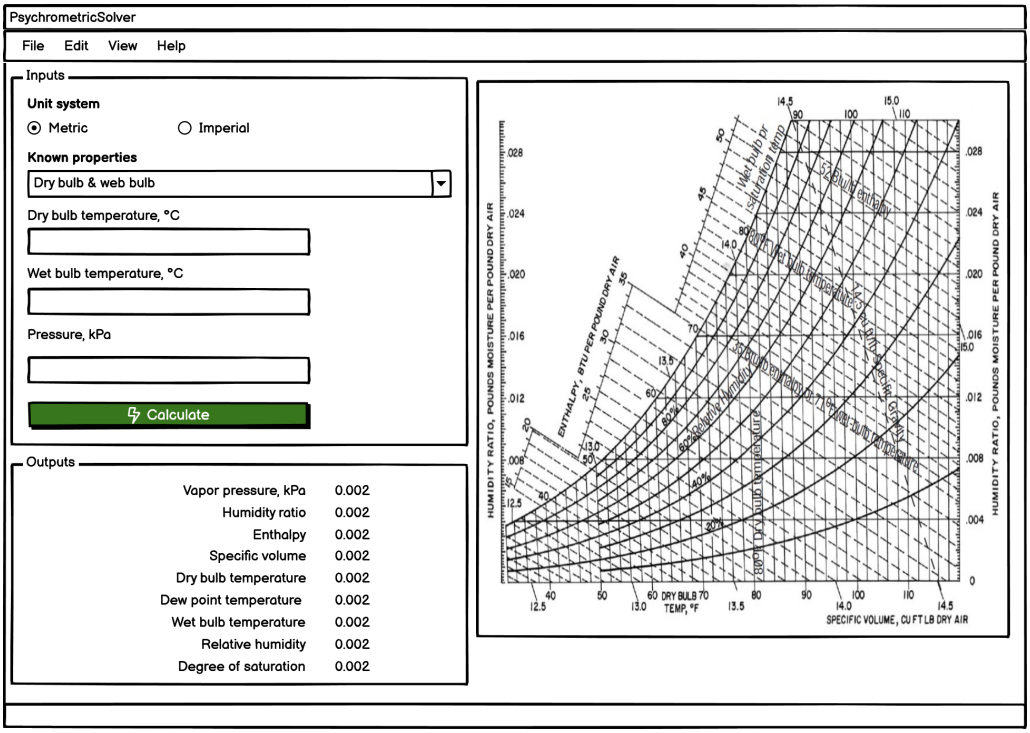

Figure 1: Main Screen.

5 System Functions

Function ID	F-001
Name	User Login
Description	Allow a registered user to log in securely.
Inputs	Username, Password
Processing Rules	Validate credentials, check lockout status.
Outputs	Login success/failure message

6 Performance Requirements

Define response times, throughput, capacity, and accuracy requirements.

7 Constraints

List compliance, hardware/software dependencies, environmental requirements.

8 Acceptance Criteria

Specify how each function will be validated and tested.

9 Appendices

Glossary, diagrams, or supporting documentation.
